PRODUCTION WORKSHOP

- Standard business management
- Strong technology research and development ability
- Mature technology
- Advanced delivery equipment
- Perfect pre-sale / Post-sale system

DEVELOPMENT HISTORY

1999-2003

- Xinguang Industrial zone plant completed
- Dubai Westhomes was established

1998

Yueqing Westhomes Circuit Breaker Co.,Ltd.was established
Zhejiang Westhomes Electric Co.,Ltd. was founded in 1998.

2009-2013

- Obtained the national Spark project certificate
- Won the bidding project of the national electricity network for the first time (Fujian)
- Won the first patent certificate issued by the Patent Office of the State Intellectual Property Office
- Zhejiang Provincial Department of Science and Technology as a science and technology enterprise
- Wenzhou Science and Technology Bureau as the municipal enterprise technology research and development center
- Won the 2009 honest private enterprise
- In 2009, Yueqing City was awarded the growth of small and medium-sized enterprises
- Won the 2011 grade A tax credit enterprise

2004-2008

- Won the product "CCC" certificate issued by China Quality Certification Center (The product passed the national compulsory certification)
- Awarded the CQC quality management system by China Quality Certification Center

2017-2018

- Listed in the national SME share transfer system
- Become a supplier of China Southern Power Grid
- Awarded the title of new Technology Enterprise Research and Development Center by Zhejiang Provincial Science and Technology Department
- Established Westinghouse Intelligent circuit breaker Wenzhou enterprise technology research and development center
- Won the 2015-2016 Wenzhou high growth enterprise title
- Won the title of Top 50 enterprises in Liushi Town in 2015
- Wenzhou Enterprise Technology Research and Development Center awarded by Wenzhou Science and Technology Bureau
- Won the Liu Town Mayor Quality Award
- Won the 2016 Liushi star enterprise
- Won the Wenzhou patent demonstration enterprise

2019-至今

- The company's new campus was put into use
- Intellectual property management system certification
- Passed the "Zhejiang Manufacturing Certification"
- Obtained the evaluation certificate of the two integration management system (informatization and industrialization integration management system)
- "Annual increase of 100,000 reclosing circuit breaker production line intelligent technology transformation project" passed acceptance
- Through ISO27001 information security management system, ISO20000 information technology service management system certification
- "Intelligent reclosing Internet of Things leakage Circuit breaker" project was rated as "Yueqing Industrial Science and Technology Plan Project in 2021"
- In 2022, it was selected as "Top Ten Brands of Intelligent Measurement Switch" by China Electric Power Industry Internet.
- It invested 40 million yuan in intelligent digital transformation and was rated as a pilot demonstration project of "digital workshop and smart factory" in Yueqing City
- Passed the provincial "specialized special new" enterprise identification
- Approved by Wenzhou green low-carbon factory
- Won the title of Wenzhou credit management demonstration enterprise
- Won the title of A-level enterprise of Zhejiang Province

ENTERPRISE QUALIFICATION CERTIFICATE

- 103-104 WSC1 AC Contactor
- 105-106 WKBO Cotrol and Protector Switch
- 107-108 WJR36 Thermal Relay

WSB1-80

Miniature Circuit Breaker (MCB)

INTELLIGENT CONTROL BUILDING THE FUTURE

WSB1-80 series mini circuit breaker is suitable for AC 50Hz or 60Hz, rated working voltage is AC230V/400V, rated current to 80A line, overload and short circuit protection of the line, can also be used as the line of infrequent operation conversion. The circuit breaker is suitable for commercial office buildings, residential buildings and similar buildings..

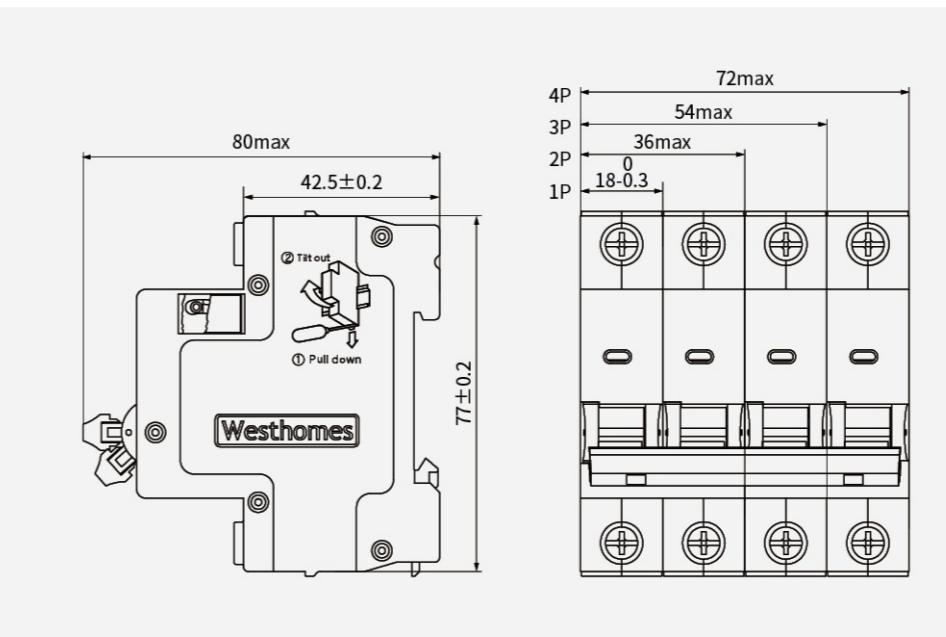

This product conforms to GB/T10963, IEC60898-1 standard, with the international advanced level.

Miniature Circuit Breaker (MCB)

WSB1-80

Main Technical Parameters

Model	WSB1-80, WSB1-80H
Rated Current In(A)	6、10、16、20、25、32、40、50、63、80A
Poles	1P, 1P+N, 2P, 3P, 3P+N, 4P
Trip characteristics	C type (5-10In); D type (10-20In)
Nominal Insulation Voltage Ui(V)	690
Rated Operational Voltage Ue(V)	AC230V/AC400V
Rated Impulse Withstand Voltage Uimp(kV)	4
Rated Short-circuit Capacity Icn(kA)	6;10
Operating short-circuit capability Ics(kA)	6;10
Mechanical Endurance	20000
Electrical Endurance	4000

WSB1L-80

Miniature Earth Leakage Circuit Breaker (integrated)(RCCB)

WSB1L-80 leakage circuit breaker(hereinafter referred to as leakage circuit breaker)is suitable for AC 50/60HZ, rated voltage AC230V, rated current to 80A circuit,as a human body shock,equipment leakage protection, and overload,short circuit protection function. It can also be used as an infrequent conversion of the line under normal circumstances, and is widely used in hotels,families,industrial and mining enterprises and other buildings and similar places.

This product complies with GB/T16917.1 GB/T16917.22 IEC61009-1 standard.

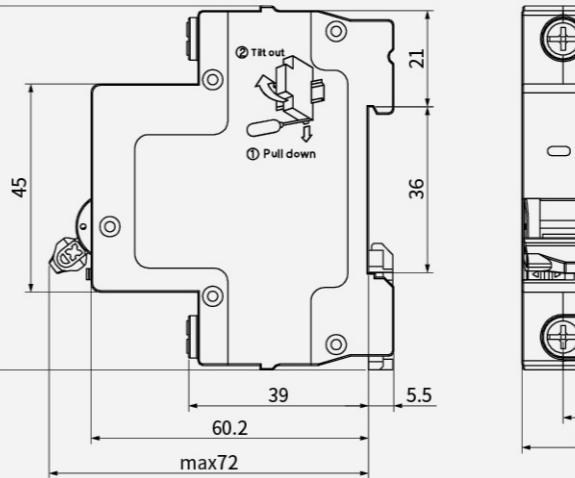

INTELLIGENT CONTROL BUILDING THE FUTURE

Miniature Earth Leakage Circuit Breaker (integrated)(RCCB) WSB1L-80

Main Technical Parameters

Model	WSB1L-80	WSB1L-80N	WSB1L-80H	WSB1L-80S

WSB1LE-80

Miniature Earth Leakage Circuit Breaker (integrated)(RCCB)

WSB1LE-80 series leakage circuit breaker (hereinafter referred to as leakage circuit breaker) is suitable for AC 50/60Hz, rated voltage AC230/400V, rated current to 80A line, when the personal shock or power grid leakage current exceeds the specified value, leakage circuit breaker can quickly cut off the fault power in a very short time. To protect the safety of personal and electrical equipment, leakage circuit breaker has overload and short circuit protection function, which can be used to protect the overload and short circuit of the line or the motor, and can also be used as the infrequent operation of the line under normal circumstances.

This product complies with GB/T16917.1 GB/T16917.22 IEC61009-1 standard.

WSB1-125

Miniature Circuit Breaker(MCB)

WSB1-125 series mini circuit breaker has the advantages of beautiful and compact appearance, light weight, excellent and reliable performance, high breaking capacity, quick trip, rail installation, housing and components using high flame retardant and impact resistant plastics, long service life and so on. Mainly used for AC 50/60Hz, rated voltage AC230/400V line overload, short circuit protection, can be infrequently on and off electrical equipment and lighting lines under normal circumstances, can also be used as line isolation, with contact opening and closing position indicator, using Th35 rail installation.

The product complies with IEC60947 GB/T10963.1 standard.

WSB1LE-125

Miniature Earth Leakage Circuit Breaker (RCCB)

This product conforms to GB/T14048.2 IEC60947-2 standard.

INTELLIGENT CONTROL BUILDING THE FUTURE

WSB1LE-125 series leakage circuit breaker (hereinafter referred to as leakage circuit breaker) is suitable for AC /60Hz, rated voltage AC230/400V, rated current 63A to 125A line, when the personal shock or power grid leakage current exceeds the specified value, leakage circuit breaker can quickly cut off the fault power in a very short time. To protect the safety of personal and electrical equipment, leakage circuit breaker has overload and short circuit protection function, which can be used to protect the overload and short circuit of the line or the motor, and can also be used as the infrequent operation of the line under normal circumstances.

Miniature Earth Leakage Circuit Breaker (RCCB)

WSB1LE-125

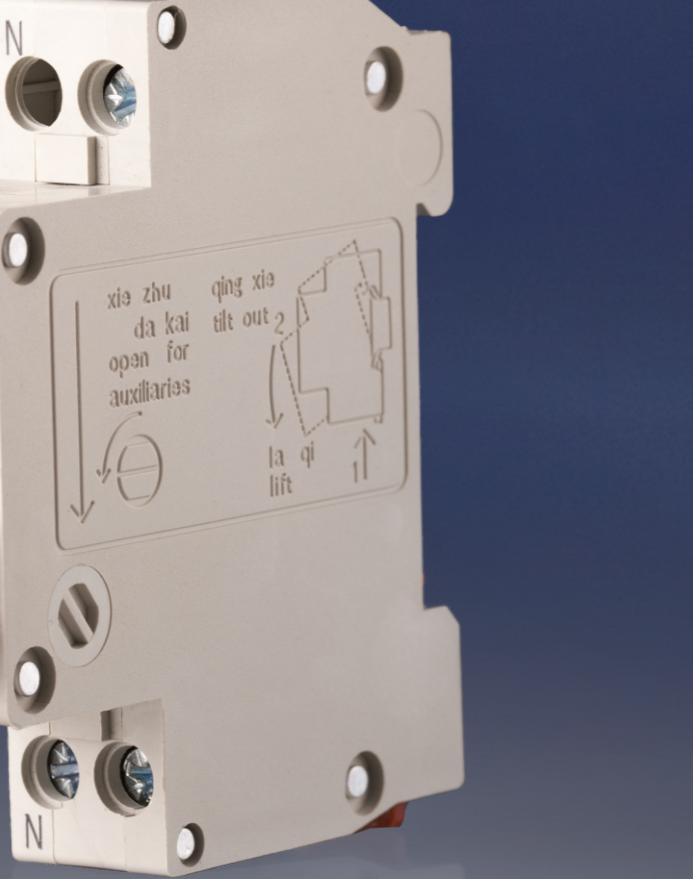

Main Technical Parameters

Model	WSB1LE-125	WSB1LE-125H
Rated Current In(a)	63、80、100、125	
Poles	1P、1P+N、2P、3P、3P+N、4P	
Selective Class	A class	
Nominal Insulation Voltage Ui(v)	690	
Rated Operational Voltage Ue(v)	AC230V/AC400V	
Rated Impulse Withstand Voltage Uimp(kv)	4	
Rated Residual Current (i△n)	100mA	
Maximum Break Time(s)	t≤0.2	
Ultimate Short-circuit Capacity(ka)	6	10
Operating Short-circuit capability Ics(ka)	6	7.5
Mechanical Endurance	8500	
Electrical Endurance	1500	

WSB2-40

Miniature Circuit Breaker (MCB)

This product complies with IEC60898.1GB/T10963.1 standard and has obtained CCC compulsory certification.

INTELLIGENT CONTROL BUILDING THE FUTURE

WSB2-40 "phase line + neutral line" circuit breaker is suitable for AC 50Hz or 60Hz, rated voltage in 230V single-phase residential lines, overload and short circuit protection of electrical lines, the product has high breaking capacity, small size, width of 18mm. The need line and the live line are cut off at the same time, which prevents the fire caused by the reverse connection of the live line and the neutral line or the potential caused by the neutral line dangerous, is the most ideal distribution protection switch in the field of civil housing.

Miniature Circuit Breaker (MCB)

WSB2-40

Main Technical Parameters

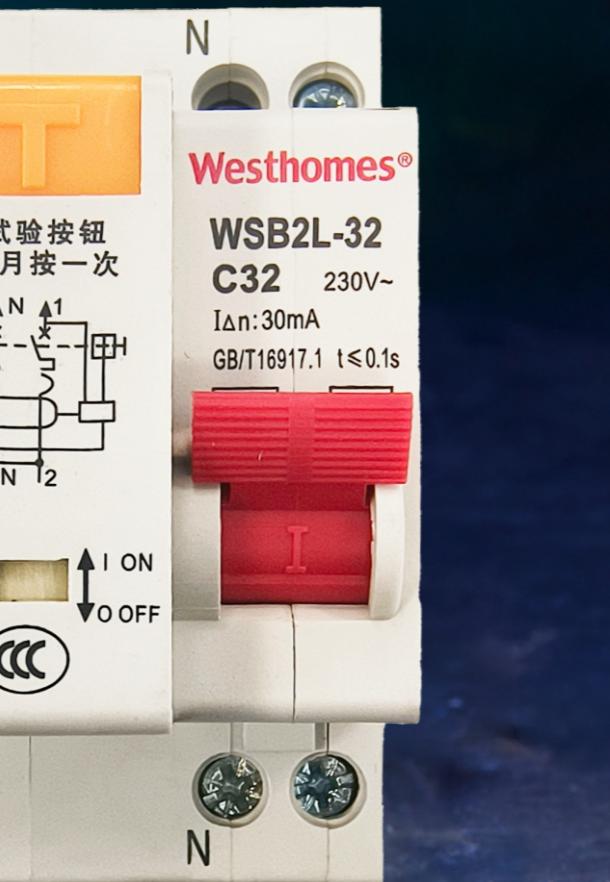

Model	WSB2-40
Rated Current In(a)	6, 10, 16, 20, 25, 32, 40
Poles	2P
Trip Characteristics	B type (3-5In):C type (5-10In)
Nominal Insulation Voltage Ui(V)	400
Rated Operational Voltage Ue(V)	AC230V
Rated Impulse Withstand Voltage Uimp(kV)	4
Rated Short-Circuit Capacity Icn(kA)	B type :3; C type :4.5
Operating Short-Circuit Capability Ics(kA)	B type :3; C type :4.5
Mechanical Endurance	20000
Electrical Endurance	10000

■ WSB2-40

WSB2L-32

Miniature Earth Leakage
Circuit Breaker (RCCB)

WSB2L-32 (phase line + neutral line + leakage) protection circuit breaker is suitable for AC 50Hz or 60Hz, rated voltage in 230V single-phase residential lines, as leakage protection, and civil electrical line overload and short circuit protection, the product has a small size, high breaking capacity; Zero and live wire are cut off at the same time, and in the case of reverse fire wire connection, it can still protect the leakage.

INTELLIGENT CONTROL BUILDING THE FUTURE

Miniature Earth Leakage Circuit Breaker(RCCB) WSB2L-32

Main Technical Parameters

Model	WSB2L-32
Rated Current In(A)	6, 10, 16, 20, 25, 32
Poles	2P
Trip characteristics	B type (3-5In):c type (5-10In)
Nominal Insulation Voltage Ui(V)	400
Rated Operational Voltage Ue(V)	AC230V
Rated Impulse Withstand Voltage Uimp(kV)	4
Rated residual current (IΔn)	30mA
Maximum break time (S)	≤0.1
Rated Short Circuit Capability Icn(kA)	B type:3; C type:4.5
Short-Circuit Withstand Capacity Ics(kA)	B type:3; C type:4.5
Mechanical Endurance	20000
Electrical Endurance	10000

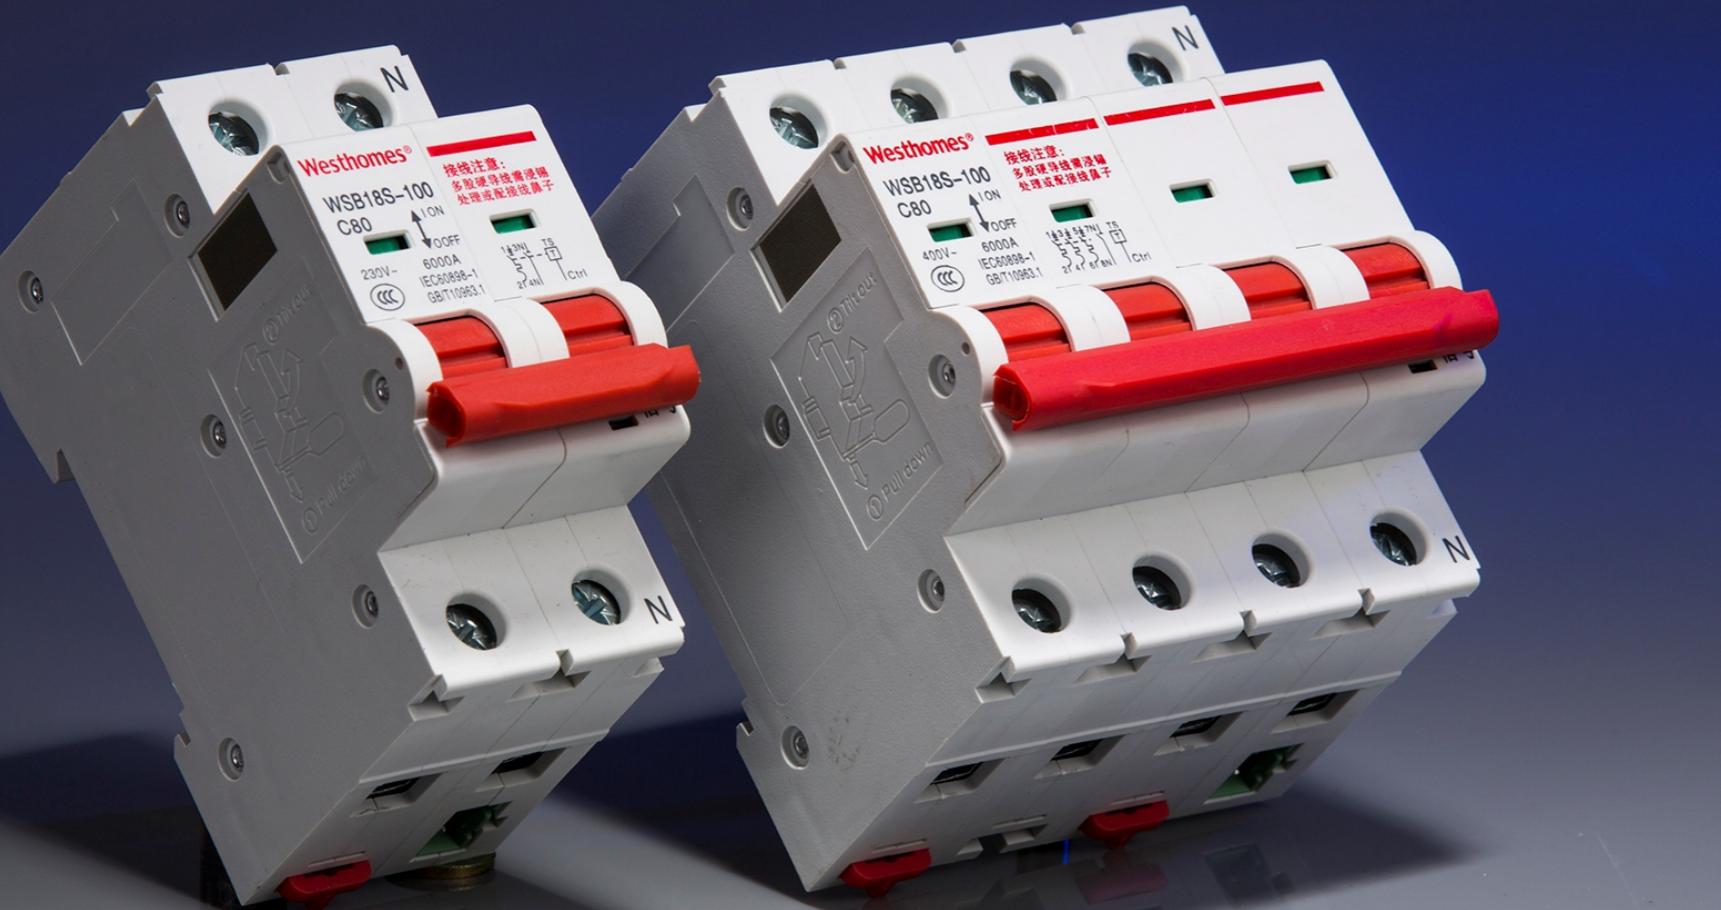

WSB18S

Miniature Earth Leakage
Circuit Breaker(RCCB)

WSB18S-100 series mini circuit breaker has the function of control signal with delay shunting trip, suitable for AC 50/60Hz, rated voltage AC230V/400V, rated current 6A to 100A in the line, remote control of the line breaking or automatic signal control breaking, while the line plays the role of overload and short circuit protection. It can also be used as a line for infrequent operation conversion.

It is widely used in matching with IC card prepaid kilowatt-hour meter to control the on-off of the line, IC card prepaid kilowatt-hour meter with external special circuit breaker to prevent IC card prepaid meter with built-in switch easy to cause fire accidents caused by contact burning, is currently the ideal product for matching with IC card prepaid kilowatt-hour meter.

INTELLIGENT CONTROL BUILDING THE FUTURE

External Miniature Circuit Breaker for Meter (MCB)

WSB18S

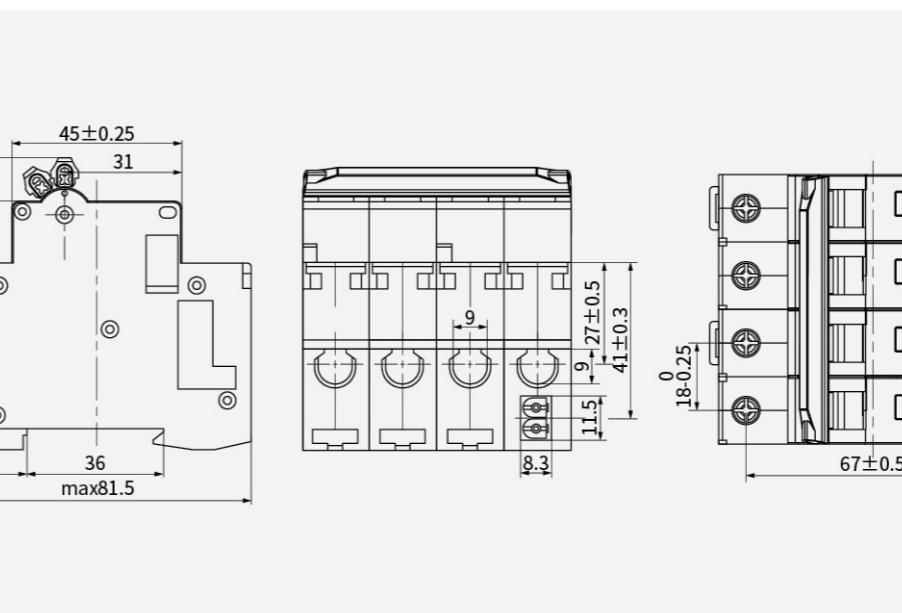

Main Technical Parameters

Model	WSB18S-100
Rated Current In(A)	6、10、16、20、25、32、40、50、63、80、100
Poles	1P+N, 3P+N
Trip characteristics	C type (5-10In)
Nominal Insulation Voltage Ui(V)	500
Rated Operational Voltage Ue(V)	AC230V/AC400V
Rated Impulse Withstand Voltage Uimp(kV)	6
Rated Short Circuit Capability Icn(kA)	6
Operating short-circuit capability Ics(kA)	6
Signal line	Standard 80cm
Mechanical Endurance	20000

WH1-80

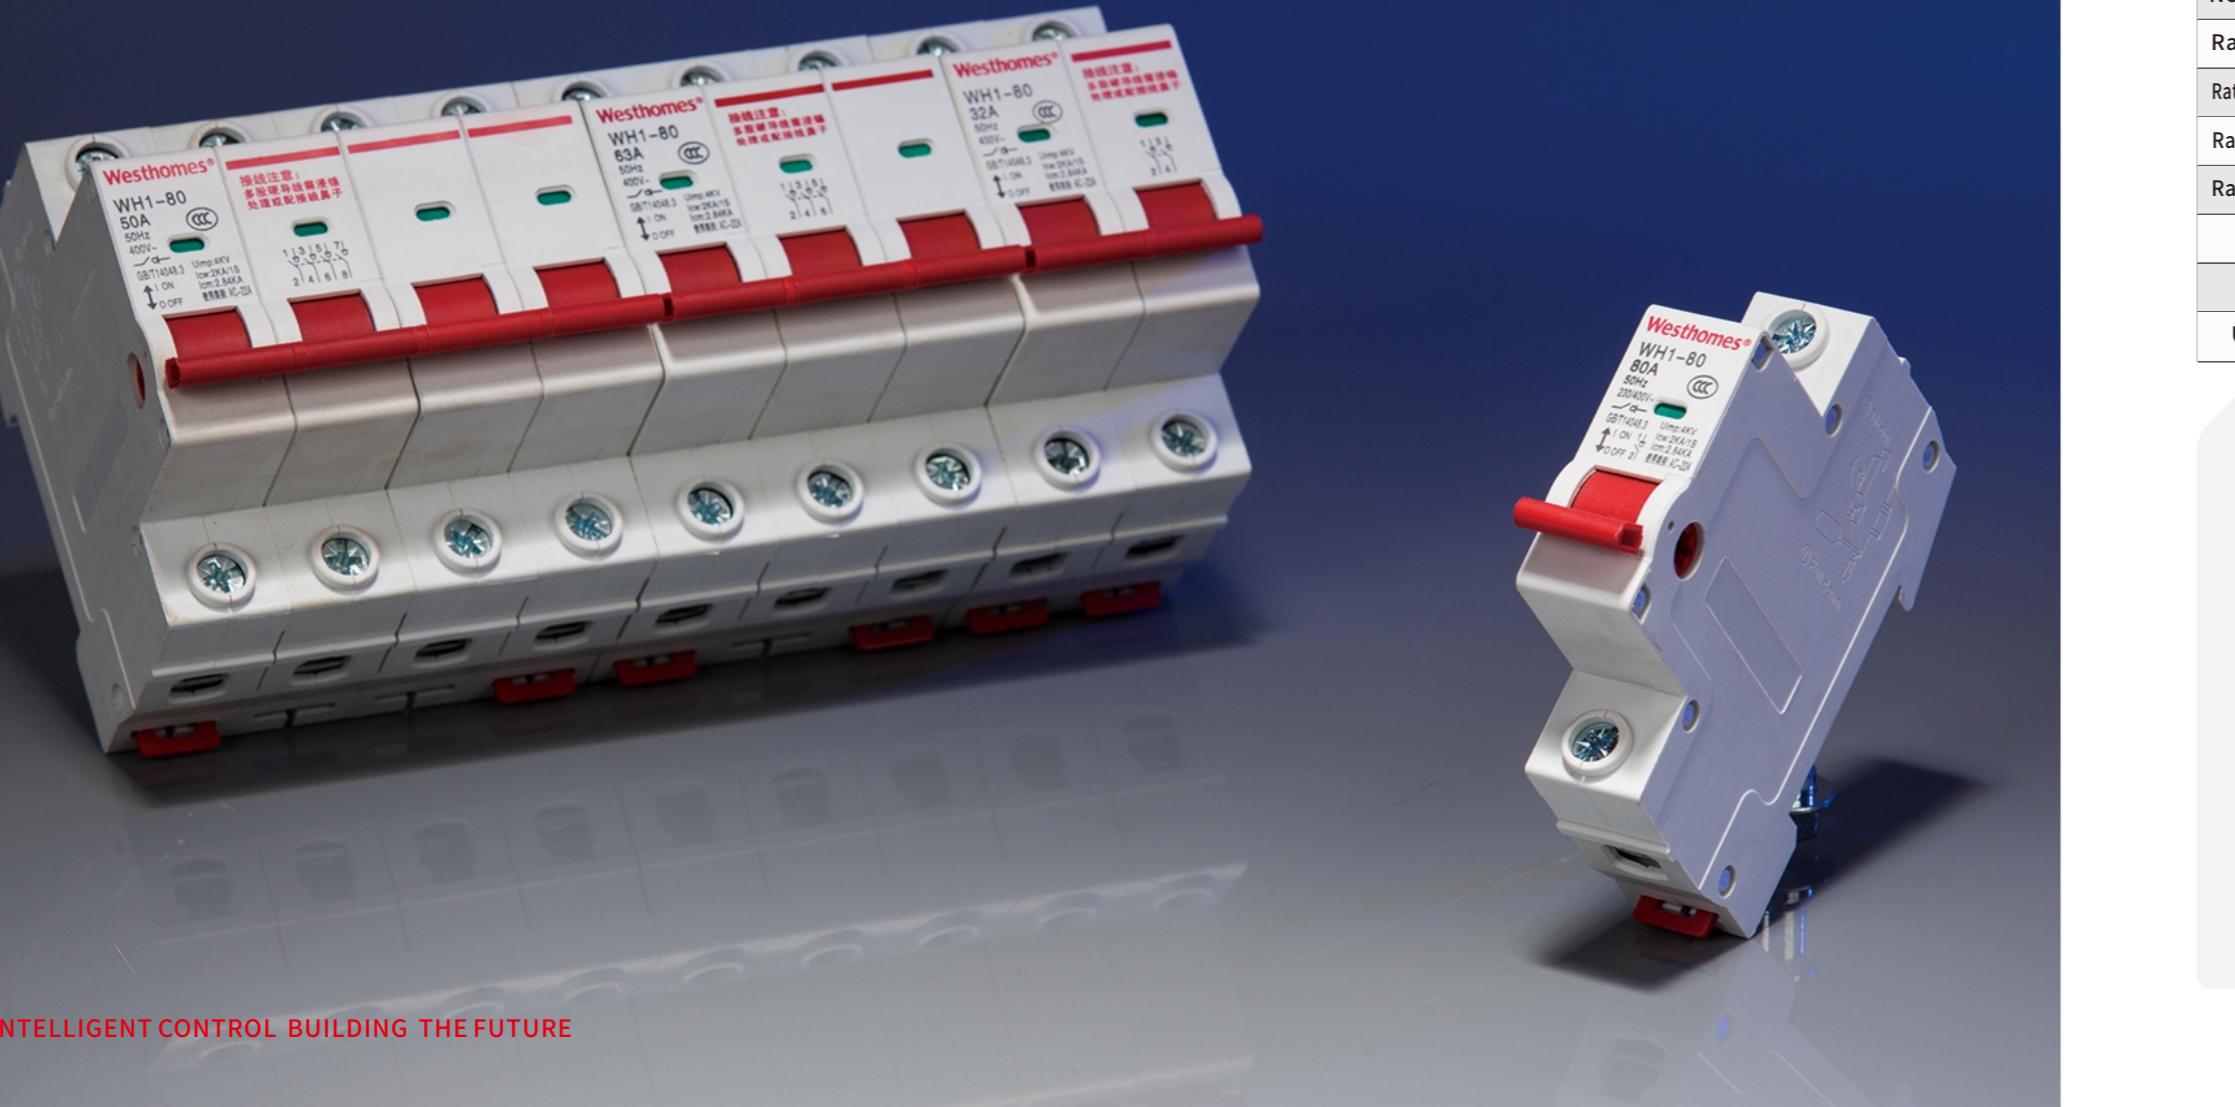

Miniature Isolator (MCB Isolator)

WH1-80 series isolation switch, suitable for AC 50/60Hz, rated voltage AC230V/400V, fixed current 20A to 125A circuit, mainly used as line isolation power supply, can also be used as a line no load infrequent conversion.

This series of isolation switch is mainly composed of insulating shell, operating mechanism and contact system. The insulating shell is made of high strength and flame retardant nylon injection molding. The contact is a bridge type double break point and the operating mechanism is a spring energy storage fast moving structure.

This series of isolation switches is beautiful and compact, with a unique opening and closing indicator window. Fast breaking speed, sensitive and reliable action, standard installation guide rail, easy installation and disassembly, single phase, two pole, three pole, four pole can be any combination, can be used with small circuit breaker, small leakage circuit breaker. Suitable for industrial, commercial, high-rise buildings, residential and other places.

This product conforms to GB/T14048.3 IEC60947-3 standard

Miniature Isolator (MCB Isolator)

INTELLIGENT CONTROL BUILDING THE FUTURE

WH1-125 series isolation switch, suitable for AC 50/60Hz, rated voltage AC230V/400V, rated current 20A to 125A circuit, mainly used as line isolation power supply, can also be used as a line no load infrequent conversion.

This series of isolation switch is mainly composed of three parts: insulation shell, operating mechanism and contact system. The insulation shell is made of high-strength, flame-retardant nylon injection molding. The contact is a bridge type double breakpoint, and the operating mechanism is a spring energy storage fast moving structure.

This series of isolation switches is beautiful and compact, with a unique opening and closing indicator window. Fast breaking speed, sensitive and reliable action, standard installation guide rail, easy installation and disassembly, single phase, two pole, three pole, four pole can be any combination, can be used with small circuit breaker, small leakage circuit breaker. Suitable for industrial, commercial, high-rise buildings, residential and other places.

This product conforms to GB/T14048.3 IEC60947-3 standard.

WSB7GQ

Self Compound Over & Under Voltage Protector (SAQG)

WSB7GQ small circuit breaker (with overvoltage/undervoltage protection) is the derivative product of WSB1-63 small circuit breaker with overvoltage and undervoltage modules. It has the advantages of advanced structure, reliable performance, high breaking ability, beautiful and small appearance.

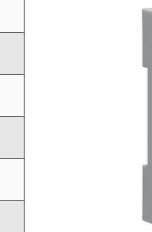

Suitable for AC 50Hz, rated voltage to 4000V, overvoltage protection setting value of 280V ±5%; It can increase the undervoltage protection whose setting value is 160V±5%, and the fixed current is less than 63A for residential, office buildings and similar buildings, lighting, distribution lines and equipment overload, short circuit and overvoltage protection, and can also be used under normal circumstances as the line's frequency conversion and the motor's infrequent start.

Self Compound Over & Under Voltage Protector (SAQG) WSB7GQ

WCU1

Surge Protect Device (SPD)

WCU1 surge protector (hereinafter referred to as "protector") is suitable for TT, IT, TN-S, TN-C, TAC'S and other power supply systems with AC 50/60Hz, 380V and below to protect the power grid from overvoltage caused by lightning strikes or surges.

WSB9SZ-100

External Miniature Circuit Breaker
for Meter (MCB)

INTELLIGENT CONTROL BUILDING THE FUTURE

WSB9SZ-100 external circuit breaker is a fully automatic pre-paid circuit breaker, suitable for AC 50Hz or 60Hz, rated operating voltage AC220V, (AC230V), rated current 6A to 100A in the line, the line is remotely controlled to break or automatically close. At the same time, the overload and short circuit protection of the line can also be used as the infrequent operation of the line, and the 1C card prepaid kilowatt-hour meter is equipped with an external special circuit breaker.

Widely used in low-voltage power grid construction, power station construction, airports, ports, railways, communications, radar stations, traffic signals, industrial and mining enterprises, but also as a residential area centralized meter reading and control charges, residential, hotels, shops, office buildings, smart home the best ideal products.

This product conforms to GB/T10963.1 IEC60898-1 standard, China Southern Power Grid and State Grid "External Low-voltage Circuit Breaker for Fee control energy meter Technical Regulations"

WSB9SZ-125

External Miniature Circuit
Breaker for Meter (MCB)

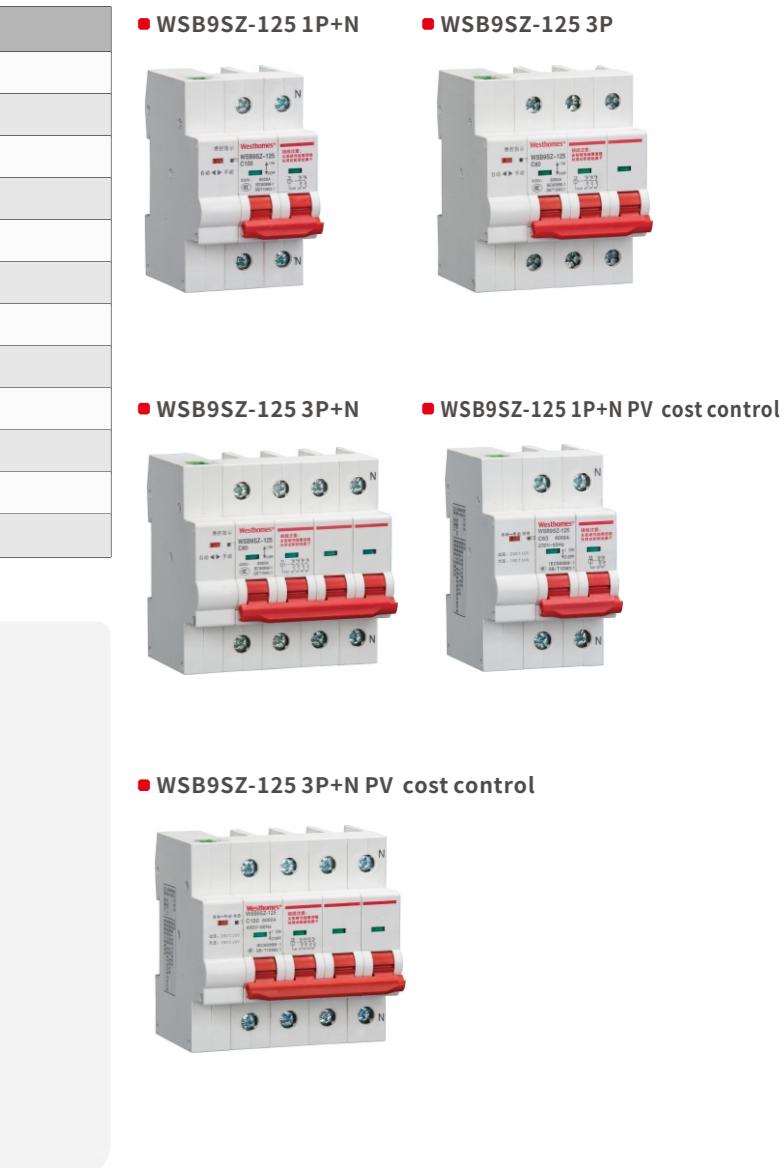

WSB9SZ-125 external circuit breaker is a fully automatic pre-paid circuit breaker, suitable for AC 50Hz or 60Hz, rated working voltage is AC230V/400V, rated current 6A to 125A line, the line is remotely controlled to break or automatically close, while the line plays the role of overload and short circuit protection. It can also be used for the infrequent operation of the line conversion, and the 1C card prepaid kilowatt-hour meter is equipped with an external special circuit breaker. Widely used in low-voltage power grid construction, power station construction, airports, ports, railways, communications, radar stations, traffic signals, industrial and mining enterprises, but also as a residential area centralized meter reading and control charges, residential, hotels, shops, office buildings, smart home the best ideal products.

This product conforms to GB/T10963.1 IEC60898-1 standard and "Technical Specification for External Low-voltage Circuit breaker for Fee control energy meter" of China Southern Power Grid.

WSB9SZ-125II

External Miniature Circuit Breaker for Meter (MCB)

INTELLIGENT CONTROL BUILDING THE FUTURE

WSB9SZ-125II external circuit breaker is a fully automatic pre-paid circuit breaker, suitable for AC 50Hz or 60Hz, rated operating voltage AC230V/400V, rated current 6A to 125A of the line, the line is remotely controlled to break or automatic closing, while the line plays the role of overload and short circuit protection. Can also be used as a line of frequency

For the conversion of many operations, the 1C card prepaid kilowatt-hour meter is equipped with an external special breaker.

Widely used in low-voltage power grid construction, power station construction, airports, ports, railways, communications, radar stations, traffic signals, industrial and mining enterprises, but also as a residential area centralized meter reading and control charges, residential, hotels, shops, office buildings, smart home the best ideal products.

IEC60898-1 standard, China Southern Power Grid "Technical Specification for external low-voltage circuit breakers for fee control energy meters".

WSB9SZL-100

IoT Miniature Earth Leakage Circuit Breaker For Meter (IoT RCCB)

WSB9SZL-100 with remote control function with overcurrent protection residual current action circuit breaker is the company's latest research and development of a new intelligent circuit breaker, using 32-bit high speed and high reliable single-chip microcomputer design, set charge control, overvoltage, undervoltage, short circuit, overload, leakage protection in one.

With RS485 communication function, it can accurately and timely transmit the power parameters and switch status to the background system, which is convenient for the operation and maintenance management of the power supply department.

The product is suitable for AC 50Hz, rated working voltage AC230V, rated current flow 6A to 100A in the line, remote control of the line, while the line plays the role of overload, short circuit, over and under voltage, leakage protection, can also be used as the line infrequent operation.

This product complies with GB/T16917.1 GB/T16917.22 IEC61009-1 standard.

Earth Leakage Circuit
Breaker (ELCB)

WCM1L series plastic shell circuit breaker with residual current protection (hereinafter referred to as circuit breaker) is one of the new circuit breakers developed by our company using international advanced design and manufacturing technology. Its rated insulation voltage is 1000V, suitable for AC 50Hz, rated working voltage 400V, rated working current to 800A circuit for infrequent conversion and motor infrequent start. The circuit breaker has the functions of overload, short circuit and undervoltage protection, which can protect the lines and power equipment from damage. At the same time, it can also protect the long-term ground fault that can not be detected by overcurrent protection.

According to its rated limit short-circuit breaking capacity (Icu), the circuit breaker is divided into M type (higher breaking type 2) and H type (high breaking type). The circuit breaker has the characteristics of small volume, high breaking, short flying arc and anti-vibration. This product complies with GB/T14048.2 IEC60947-2 standard requirements

Electronic Molded case Circuit Breaker

INTELLIGENT CONTROL BUILDING THE FUTURE

WCM1E series intelligent plastic case circuit breaker is developed by our company using international advanced design and manufacturing technology, open 1000V, suitable for AC 50Hz, rated working voltage 400V, rated working current to 1250A circuit for infrequent conversion and motor infrequent start. The circuit breaker has overload long delay inverse time, open short delay inverse time, short circuit short delay fixed time, short circuit instantaneous and long undervoltage protection force, which can protect the line and current equipment from damage. This product complies with GB/T14048.2 IEC60947-2 standard requirements.

WCM3

Moulded Case Circuit Breaker (MCCB)

The main technical performance of WCM3 series plastic shell circuit breaker has reached the international level in the 1990s. It has the features of compact structure, small size, high short-circuit breaking ability, no flaring, modular installation of internal attachments, use of terminal protective cover to enhance safety, and "base", "cover" with different colors to enhance beauty.

WCM3 series plastic shell type circuit breaker (hereinafter referred to as circuit breaker), suitable for AC 50Hz (or 60Hz), rated insulation voltage 1000V, rated working voltage 660V(690V) and below, DC 250V and below, rated current 12.5A~1600A circuit used for power distribution, It is used for infrequent closing and disconnecting under normal conditions, and is used to protect the line and equipment from overload, short circuit and undervoltage.

Circuit breakers with rated shell class current of 400A and below can also be used for infrequent starting of cage motors, interruption in operation, and protection when the motor is overloaded, short-circuited and undervoltage.

Moulded Case Isolator
(MCCB Isolator)

This series of isolation switch is suitable for AC 50Hz, rated insulation voltage 1000V, rated voltage AC400V
For mixed on-off resistance and inductance loads, including suitable overloads.
The series of circuit breakers can be installed vertically (that is, vertically installed), and can be installed horizontally (that is, horizontally installed).

This product conforms to GB/T14048.3-2017 standard

WCM4E

Moulded Case Circuit Breaker (LED+Metering +Signal Carrier)

WCM4E series plastic-case circuit breaker (hereinafter referred to as circuit breaker) is one of the new circuit breakers developed and developed by our company using international advanced technology. Its rated insulation voltage is 1000V, suitable for AC 50Hz or (60Hz), rated working voltage 400V and below. In the rated working current of 15A to 800A, it is used to distribute electrical energy, make infrequent closing and disconnecting under normal conditions, and play a protective role in the overload and undervoltage of the line and equipment. Circuit breakers with rated shell class current of 400A and below can also be used for infrequent starting of squirrel cage motors, interrupted operation and protection when the motor is overloaded, short circuited and under voltage.

This product complies with GB/T14048.2 IEC60947-2 standard requirements.

Moulded Case Circuit Breaker
(Measuring)

INTELLIGENT CONTROL BUILDING THE FUTURE

WCM4E measuring switch is an intelligent measuring switch (characteristic current) series independently developed and produced by our company, which is suitable for AC 50Hz, fixed current 250A (100A-250A can). In a distribution network with a rated insulation voltage of 1000V and a fixed working voltage of 400V, the three-phase four-wire and the neutral point are directly grounded. The measuring switch (characteristic current) has many IoT sensing functions such as HPLC communication, high-precision AC sampling, power supply relationship topology identification, metering box management, power theft warning, power outage event reporting, line loss analysis and judgment, terminal temperature detection, automatic fault diagnosis, etc. With overload long delay, short circuit short delay, short circuit instantaneous, over and under voltage and phase break protection functions, a variety of protection functions for lines and thin equipment to protect the detection and monitoring of the load end can reduce the power grid operation and maintenance costs, can provide the necessary data for future energy efficiency system.

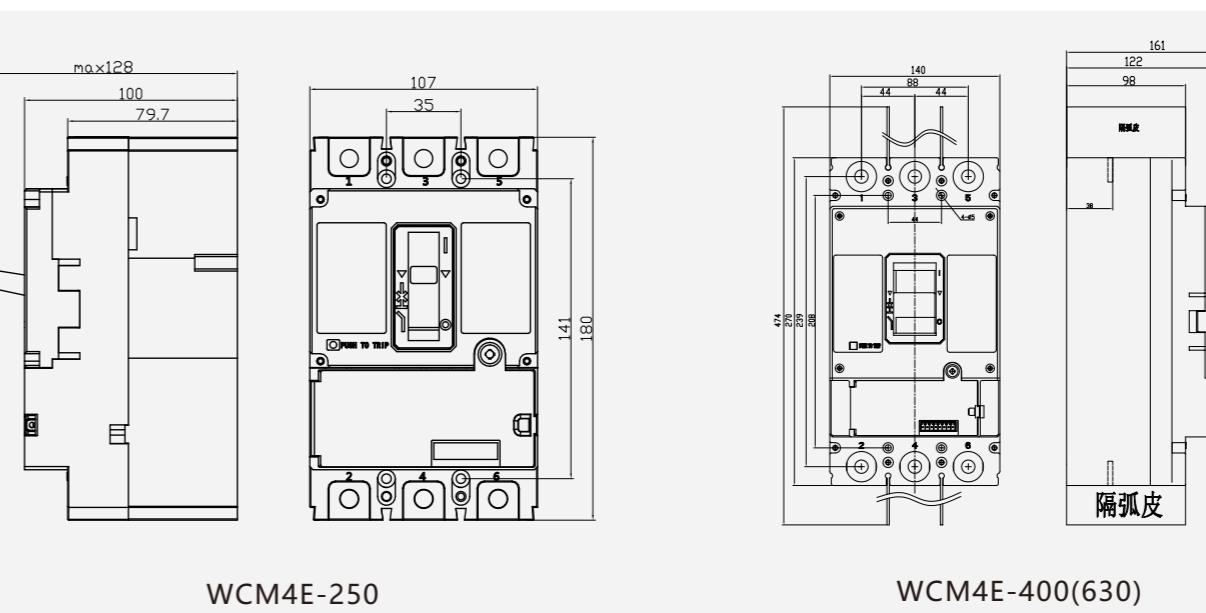

This product complies with GB/T14048.2 IEC60947-2 standard requirements.

Residual Current Protect Circuit Breaker
(RCCB Electronic type)

INTELLIGENT CONTROL BUILDING THE FUTURE

The circuit breaker is suitable for the environment of three-phase four-wire auxiliary power supply. Rated insulation voltage 1000V, suitable for 50Hz, rated operating voltage to 400V, fixed current to 400A circuit for infrequent conversion and motor infrequent start. The circuit breaker has overvoltage protection, undervoltage protection, voltage loss protection, phase loss protection, overload long delay inverse time, short circuit delay inverse time, short circuit delay fixed time, short circuit instantaneous and leakage trip protection functions, which can protect the line and power equipment from damage.
This product complies with GB/T14048.2 IEC60947-2 standard requirements.

WCM7ELS

Residual Current Pprotect circuit Breaker (MCCB)

This product is a cost-controlled circuit breaker. It can be used with the meter with the cost-control function to realize the function of automatic closing power supply with charges and tripping power failure in arrears. Its control logic conforms to the provisions of "QGDW11421-2015 Technical Specification for external Circuit breakers of energy meters".

The circuit breaker is provided with a special port, which is connected with the charge control passive output terminal of the energy meter. When the user energy meter time, energy meter fee control terminal output passive short circuit switching signal, circuit breaker normal closing power supply; In arrearage, the energy meter outputs the passive break switch signal, then the circuit breaker is switched off. After the user pays the fee, the charge control terminal of the electricity meter automatically outputs the closing command, and the circuit breaker automatically transmits power to realize the function of unattended power transmission.

Because the circuit breaker has overload, short circuit, leakage, overvoltage, undervoltage, lack of equal with the "GB14048.2 low voltage switch - circuit breaker" standard general protection function. For this reason, in accordance with the requirements of the "QGDW11421-2015 External Circuit Breaker Technical Specification for energy meters", the circuit breaker is forbidden to respond to the cost control signal of energy meters within 5 seconds after the equipment is powered on. However, it does not affect the normal protection trip function of the circuit breaker. Suitable for three-phase four-wire neutral point direct grounding (TT) low-voltage power grid system, used for line or electrical equipment grounding fault, over current, short circuit, over voltage, under voltage, power off automatic jump and lack of equal protection, but also has the pre-payment function.

Products comply with standards: GB/T14048.2, DL/T20... Communication Protocol for Residual Current Protector

WCW1

Universal type air Circuit Breaker (ACB)

INTELLIGENT CONTROL BUILDING THE FUTURE

WCW1 series intelligent universal circuit breaker (hereinafter referred to as circuit breaker), suitable for AC 50Hz, rated voltage to 600V(690V) and below, rated current 200A~7500A distribution network, used to distribute power and protect lines and power equipment from overload, undervoltage, short circuit, single-phase grounding and other faults. Circuit breaker has intelligent protection function, selective protection is accurate, can improve the reliability of power supply, avoid unnecessary power outage. With an open communication interface, it can be "four remote" to meet the requirements of the control center and automation system. Circuit breaker pulse voltage 8000V at an altitude of 2000 meters (different altitudes according to the standard correction, the maximum does not exceed 12000V).

This product complies with GB/T14048.2 IEC60947-2 standard requirements.

WCQ2C

Dual Power Automatic transfer
Switch (CB class ATS)

INTELLIGENT CONTROL BUILDING THE FUTURE

Dual power automatic switching switch (hereinafter referred to as switching switch) is suitable for AC 50Hz or 60Hz, rated working voltage 400V, rated working current 63A and below double circuit power supply system. Selective conversion between the two power sources can be performed as required. The product has the functions of short circuit, overload, undervoltage and voltage loss protection, and also has the functions of standby fire, double division and output closing signal. It is especially suitable for the installation and use of office buildings, shopping malls, banks, stations, hospitals and high-rise buildings with fire protection requirements.

The product conforms to GB/T14048.11 standard, and has obtained two patents of utility model and design.

Dual Power Automatic transfer Switch (CB class ATS) WCQ2C

WCQ2A

Dual Power Automatic Transfer Switch(CB class ATS)(Intelligent)

WCQ2A series dual power switch is suitable for AC 50Hz, rated working voltage 400V, rated working current 16A~2000A. The conversion between the common power supply (N) and the standby power supply (R) can also be set to manually and as a control circuit switch for control, signal, interlock and other purposes. This product has a communication port in some models to achieve remote control, so that users can realize unattended substation. Suitable for residential areas, military facilities, hospitals, shopping malls, airports and other places.

This product conforms to GB/T14048.11 IEC60947-6-1 standard.

WCQ2G

Dual Power Automatic Transfer Switch(PC class ATS)(PV)

WCQ2G series dual power switch is suitable for AC 50Hz, rated working voltage 400V, rated working current 16A~3200A. The conversion between the common power supply (N) and the standby power supply (R) can also be set to manually and as a control circuit switch for control, signal number, interlock and other purposes. This product has a communication port in some models to achieve remote control, so that users can realize unattended substation. It is suitable for small residential areas, military facilities, hospitals, shopping malls, airports and other places.

This product conforms to GB/T14048.11 IEC60947-6-1 standard.

Dual Power Automatic Transfer Switch(PC class ATS)(PV type)

Dual power automatic switching switch is a newly developed micro household power switching switch. The switch is mainly used to test whether the main power supply or backup power supply is normal. When the normal power supply is abnormal, the standby power supply will immediately start to work, so as to ensure the continuity, reliability and safety of the power supply. This product is designed for home rail installation and is specifically used for PZ30 power distribution box.

The dual power switch is suitable for emergency power supply systems with 50Hz or 60Hz and a fixed amount of 400V AC. ATS has the characteristics of solid construction, reliable conversion, easy installation and maintenance, and long life. Widely used in a variety of occasions that can not be sustained power outage, that is, reliable electricity work, but also manual operation. An ATS is composed of a TSE and a controller.

According to GB/T14048.11, formulate Part 6-1: Multi-function equipment and Switchgear It is known that ATS is the most suitable low-voltage switchgear and control device.

Open Knife Switch

INTELLIGENT CONTROL BUILDING THE FUTURE

HD11F series single-throw and double-throw protective knife switch is our company in HD11, HS11 based on the new development of products, is an ideal replacement for HD11, HS11, greatly improve the personal safety protection performance, to prevent false electric shock.

This series of products is mainly used in low-voltage distribution equipment, for infrequent manual switching on and off, isolation of power supply.

This product complies with IEC60947-3 GB/T14048.3 standard.

HH15(QSA)

Isolator Switch Fuse Set

INTELLIGENT CONTROL BUILDING THE FUTURE

HH15(QSA) series isolation switch fuse set, HH15A(QA), HH15P(QP) series isolation switch, HH15S(QSS), HH15AS(QAS), HH15PS(QPS) series of double-throw transfer switches (hereinafter referred to as switches), mainly suitable for distribution circuits and motor circuits with high short circuit current, as manual infrequent operation of the main switch or master switch. Among them, QSA and QSS series switches can be used for short-circuit protection. The switch conforms to GB14048.3 IEC60947-3 standard, and is widely used in more advanced drawer type low-voltage complete sets of devices.

HR17B**Fuse type Dis-connector**

HR17B series fuse type isolation switch (hereinafter referred to as switch), suitable for AC 50Hz, rated voltage to 400V, agreed heating current to 800A with high short circuit current distribution circuit and motor circuit, used as manual infrequent operation of the power switch, isolation switch and emergency switch, and for circuit short circuit protection. However, it is generally not used for directly opening and closing a single motor.

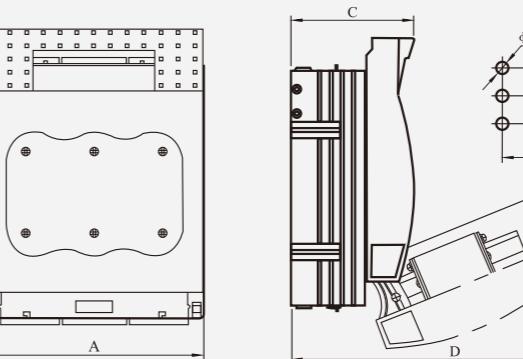

The switch is beautiful in appearance, novel and simple, simple in structure, easy to operate, in line with IEC60947-3 GB14048.3 standard, is the best choice of similar products.

WSC1

AC Contactor

INTELLIGENT CONTROL BUILDING THE FUTURE

WSC1 series AC contactor (hereinafter referred to as contactor) is mainly used for AC 50Hz or (60Hz), rated working voltage up to 690V, rated current from 9A to 1000A when rated working voltage is 380V under AC-3 use category, for long-distance connecting and disconnecting circuit. And can be combined with the appropriate thermal overload relay to form an electromagnetic starter to protect.

A circuit capable of operating overloads, contactors are suitable for frequently starting and controlling AC motors.

WKBO

Control and Protector Switch

INTELLIGENT CONTROL BUILDING THE FUTURE

WKBO series control protection switch, mainly used for AC 50Hz(60Hz), rated voltage below 690V. The working current is less than 125A in the power system to switch on, carry and break the current under normal conditions and overload conditions, and can switch on and carry and break the current under abnormal normal conditions (such as short circuit current).

WKBO series control and protection switches have exquisite appearance, powerful intelligent function, accurate current trip setting, easy installation and use, especially suitable for modern buildings in the pump, wind, air conditioning, fire, lighting and other electronic control systems: Motor control and protection in metallurgy, coal mine, petrochemical, port, ship, railway, textile and other fields, motor control center (MCC) is especially intelligent electronic control system or high breaking capacity MCC (requires ICS up to 50 ka distribution control system); Single motor control and protection in factories or workshops, as well as remote control in lighting systems.

This product meets the standard: GB/T14048.9 IEC60947-6-2.

WJR36

Thermal Relay

Thermal relays can only be mounted independently. The product can be combined with CJT1 contactor to form QC36 type electromagnetic starter.

WJR36 series thermal overload relay (hereinafter referred to as thermal relay) is suitable for AC 50Hz/60Hz voltage to 690V, current 0.25~160A long-term operation or discontinuity

Overload and phase break protection of AC motor in phase operation.

Thermal relay has phase break protection, temperature compensation, automatic and manual reset, product performance is stable and reliable.

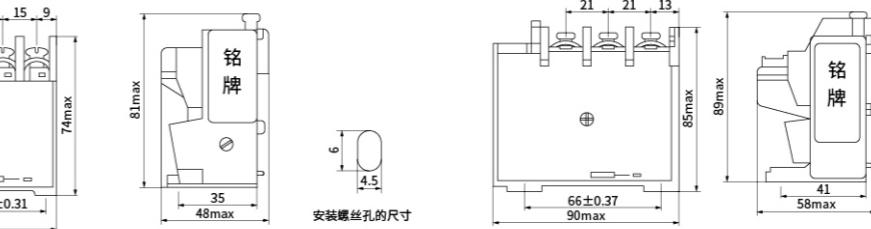

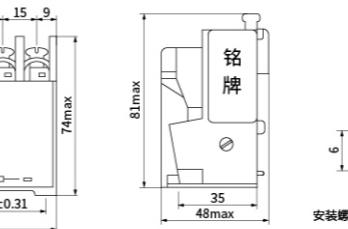

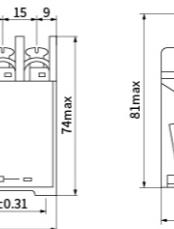

This product complies with the standard: GB/T14048.4 GB/T14048.5, IEC60947-4-1.

WSB8-80

Miniature Circuit Breaker(MCB)

INTELLIGENT CONTROL BUILDING THE FUTURE

WSB8-80 series miniature circuit breaker is suitable for AC50Hz or 60Hz, rated working voltage is AC230V/400V, rated current to 80A line, overload and short circuit protection of the line, can also be used as a line of infrequent operation of the switching purpose. The circuit breaker is suitable for commercial office buildings, residential buildings and similar buildings.

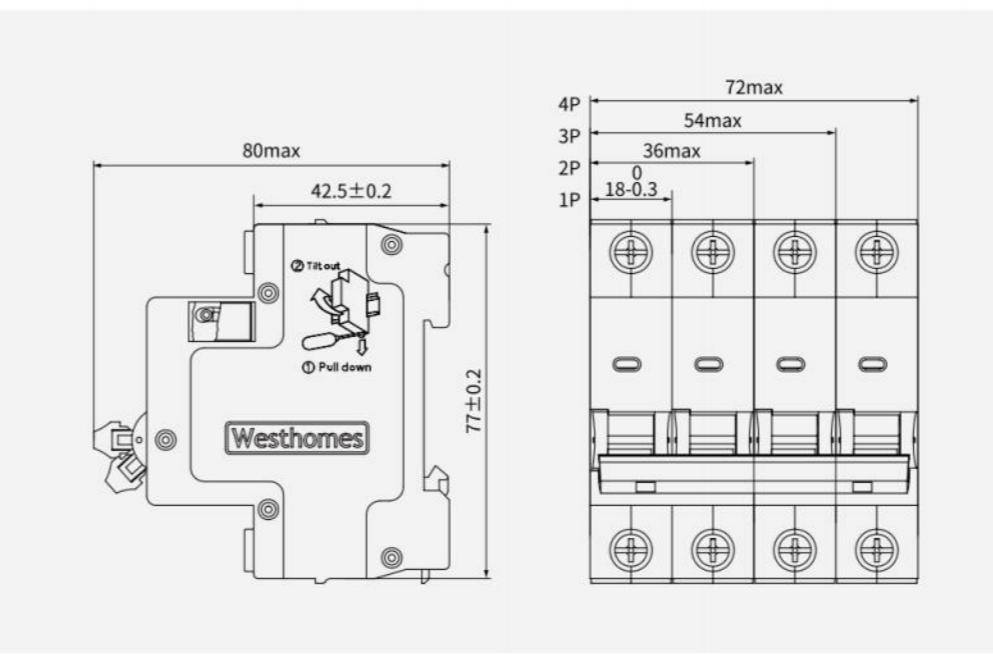

This product conforms to GB/T10963.1 IEC60898-1 standard, with the international advanced level.

Miniature Circuit Breaker(MCB)

WSB8L-80

MiniatureEarthLeakageCircuit
Breaker(integrated)(RCCB)

WSB8L-80 earth leakage circuit breaker (hereinafter referred to as earth leakage circuit breaker) is suitable for AC 50/60HZ, rated voltage AC230V, rated current up to 80A circuit, as a human electric shock, equipment leakage protection, and overload, short-circuit protection, It can also be used as an infrequent conversion of the line under normal circumstances, and is widely used in hotels, families, industrial and mining enterprises and other buildings and similar places.

This product complies with GB/T 16917.1 and GB/T16917.22 standards.

WSB8LE-80

Miniature Earth Leakage Circuit Breaker(integrated)(RCCB)

WSB8LE-80 series residual current circuit breaker (with overcurrent protection) is suitable for AC 50/60HZ, rated voltage 230V/400V, rated current to 80A line, when the person touches or the leakage current of the power grid exceeds the specified value. Residual current action circuit breaker can quickly cut off the fault current in a very short time, to protect the safety of people and electrical equipment, also used as a line overload, short circuit and infrequent conversion and infrequent starting of the motor. This product is suitable for industrial, commercial high-rise buildings and residential and other places.

This product complies with GB/T16917.1GB/T16917.22IEC61009-1 standard.

WSH8-100

Miniature Isolator (MCB Isolator)

INTELLIGENT CONTROL BUILDING THE FUTURE

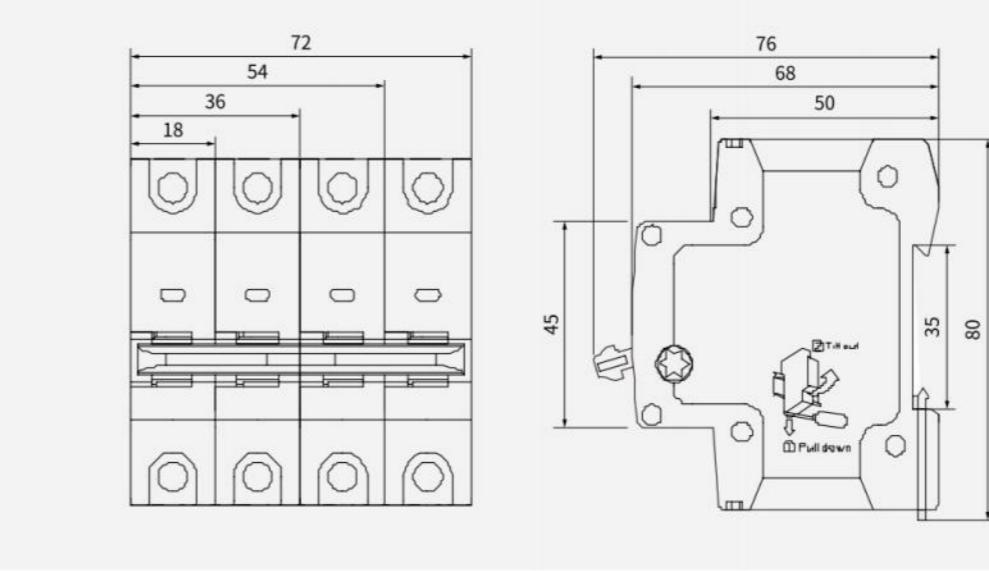

WSH8-100 series isolating switches, suitable for circuits with AC 50/60Hz, rated voltage AC230V/400V, rated current 20A to 100A, mainly for isolating the power supply of the line, and also for infrequent switching of the line without load. This series of disconnectors mainly consists of three parts: insulating shell, operating mechanism and contact system. The insulating shell is made of high-strength, flame-retardant nylon injection molding, the contacts are bridge-type double-breakpoints, and the operating mechanism is a spring-energy-storage snap-action structure. This series of isolating switches has a beautiful and compact appearance, with a unique opening and closing indication window. Fast breaking speed, sensitive and reliable action, standard mounting rail, easy to install and disassemble, single-phase, two-pole, three-pole, four-pole can be any combination, and can be used in conjunction with small circuit breakers, small leakage circuit breakers. Applicable to industrial, commercial, high-rise buildings, residential and other places.

Miniature Earth Leakage Circuit Breaker(integrated)(RCCB)

WSB5-40

Miniature Circuit Breaker(MCB)

WSB5-40 "phase line + neutral line" circuit breaker is suitable for single-phase residential lines with AC 50Hz or 60Hz and rated voltage of 230V to protect electrical lines from overload and short circuit. The product has high breaking capacity, small size and width of 18mm. The neutral line and live line are cut off at the same time, eliminating the personal and fire hazards caused by the reverse connection of the live line and neutral line or the neutral line to the ground potential. It is the most ideal distribution protection switch in the field of civil housing.

This product complies with IEC60898.1 and GB/T10963.1 standards.

WSB5L-40

Miniature Earth Leakage
Circuit Breaker(RCCB)

WSB5L-40 "phase line + neutral line + leakage" protection circuit breaker is suitable for single-phase residential lines with AC 50Hz or 60Hz and rated voltage of 230V. It is used as leakage protection and protects civil electrical lines from overload and short circuit. The product has small size and high breaking capacity; the neutral and live wires are cut off at the same time, and it can still protect against leakage when the live wire is connected in reverse.

This product complies with IEC61009 and GB/T16917.1 standards.

WCM8

Moulded Case Circuit Breaker(MCCB)

WCM8 series Moulded case circuit breaker, rated insulation voltage 1000V, rated voltage AC400V, rated frequency 50Hz, rated current from 10~800A. Shell frame current 400A and below circuit breaker can be used as infrequent starting of motor. Circuit breakers for power distribution are used to distribute power in power distribution network and can be used for overload, short circuit and under voltage protection of lines and power supply equipments. Circuit breakers for motor protection are used for starting and breaking of squirrel-cage motors in power distribution networks and for overload, short-circuit and under-voltage protection of motors. This product complies with GB/T14048.2 low voltage circuit breaker standard.

WSB6Z

Photovoltaic DC Circuit Breaker

WSB6Z-40DC/63DC series photovoltaic DC circuit breakers are designed for DC systems. It is suitable for DC systems with rated currents up to 63A and rated voltages up to 1500V. They provide overload and short-circuit protection and can also be used for infrequent on-off switching of lines under normal circumstances.

The circuit breaker has advantages of beautiful and compact appearance, excellent and reliable performance, high breaking capacity, quick tripping, and is installed using TH35 standard rails. The body shell is made of highly flame-retardant and impact-resistant plastic, making it easy to install, have a long service life.

The product has a position indicator for contact opening and closing. The DC circuit breaker complies with GB/T14048.2 standards and IEC/EN60947-2.

Photovoltaic DC Circuit Breaker
